

UPDATE YOUR TAC DRIVE SOFTWARE | WINDOWS

It is strongly recommended that you backup all files and folders stored on your TAC Drive before you begin the update process.

Make sure your TAC Drive is connected to your computer and that the TAC Drive application is not running before continuing.

These update instructions should provide for a smooth transition. However, if you require assistance, please contact us at: support@tacdrive.com or call: 1.800.979.eTAC (3822)

Thank you for choosing TAC Drive,
The TAC Drive Team

Step 1: Download

Download the latest TAC Drive software at:
<http://www.tacdrive.com/main/support/>

If you are presented with the option to **Save** or **Open** the file, select **Save** (we recommend saving to your desktop).

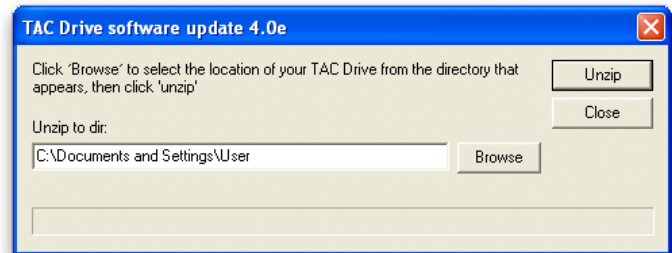

Step 2: Install

When the download completes, locate and double-click **TACDrive##.zip** (where ## is the version number).

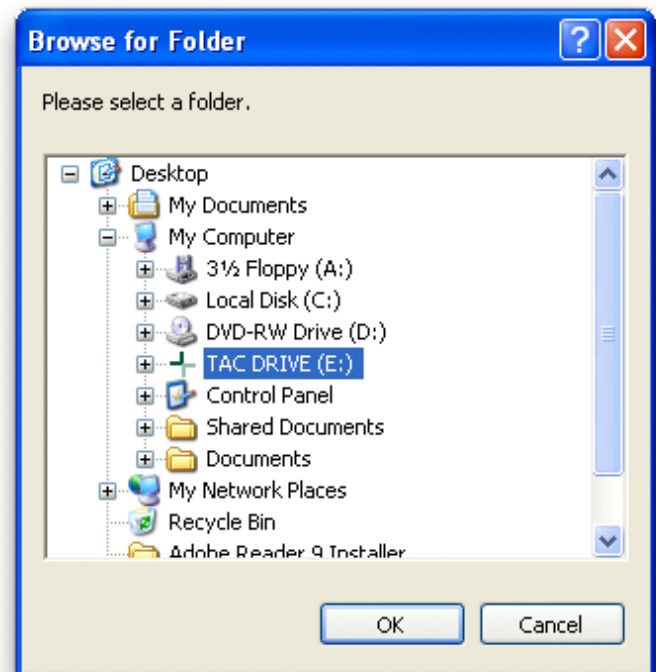

From the window that opens, double-click **TACDrive##.exe** to launch the installer.

A security warning indicating that “The publisher could not be verified” may pop-up. It is safe to click **Run** and continue the installation.

Click **Browse**.

Select **TACDRIVE** and click **OK**.

Click **Unzip** and allow a few moments for the update process to complete.

Step 3: Verify

Launch the TAC Drive application and ensure your drive was successfully updated by clicking the **Help** menu, selecting **About**, and verifying the version number.
